# Key insights

Key equity markets in June recovered from their lows at the start of the year and posted a 52 week high. In a similar tone to previous months, the actions of central banks have been a key driver of the global financial markets.

In the US, the Federal Open Market Committee (FOMC) held its June policy meeting. As widely expected, the FOMC “decided to maintain the target range for the federal funds rate unchanged at  $\frac{1}{4}$  to  $\frac{1}{2}$  percent”. Although growth in economic activity appears to have picked up, the pace of improvement in the labour market has slowed. Unemployment rate went up to 4.9% in June offsetting the marginal improvement of 0.2 percentage points (p.p) made in May. In addition, business fixed investment has continued to be soft while inflation remains below the Committee’s 2% long run objective, partially reflecting earlier declines in energy prices and in prices of non-energy imports. The FOMC has issued a statement in June to “continue to closely monitor inflation indicators, global economic and financial developments”.

Oil prices remained unchanged, approximately at US \$50 in June 2016.

In Europe, the European Central Bank (ECB) left interest rates unchanged. The ECB decided to leave the interest rate on the main refinancing operations, interest rates on the marginal lending facility and the deposit facility unchanged at 0.00%, 0.25% and -0.40% respectively. The next monetary policy meeting will be on 21 July 2016.

The ECB continues its Monthly Asset Purchase Programme (APP) of €80 billion per month in addition to the non-standard measures such as their first operation of a new series of Targeted Longer-term Refinancing Operations (TLTRO II) and corporate bond purchases under the Corporate Sector Purchase Programme (CSPP).

The UK held a referendum on their membership of the European Union (EU). The result was for the UK to leave the EU (Leave 51.9% / Remain 48.1%).

This will likely lead the UK and Europe into a new period of instability and uncertainty;

1. There is no precedent for a member country to leave the EU;
2. The UK was the world’s 5th largest economy; and
3. There are growing concerns that the EU will fragment further.

The ECB considers significant downside risks to the growth of the Eurozone due to heightened political risks, in particular Brexit.

In April, China’s second quarter Gross Domestic Product (GDP) was up 6.7% YoY while on a quarterly basis expanded by 1.8%, marginally performing above market expectations. The latest China Purchasing Manager Index (PMI) declined slightly to 50.0 from its previous of 50.1. Trade data announced was above market expectations due to a larger than expected fall in imports at -8.4% while exports contracted at -4.8% (below market expectations). Retail sales grew by 10.6%, marginally exceeding market consensus.

Domestically, the RBA kept the cash rate unchanged at 1.75%. Unemployment rate rose to 5.8% in June, up from 5.7% in the previous 3 months matching market expectations.

## Australian equities

Australian equities declined in June, finishing the month down by 2.4%.

## International equities (\$A)

Emerging market equities went up by around 1.2% approximately in June 2016. Unhedged and hedged developed market equities fell by 3.8% and 1.2% respectively.

## International equities (local currencies)

Major equity markets globally had a positive performance in the month of June with the exception of Japan and Europe. The Japanese equity market fell by 9.6% while Europe saw a fall in its equities by 6.5%. For the financial year to date, Japanese, European and Chinese equities are down by -23.0%, -16.3% and -31.5%.

# Fixed income

Australian and global bond markets had a slightly positive month with returns rising by 1.3% and 2.0% in June respectively.

# Australian dollar against major currencies

The Australian dollar (AUD) appreciated against most major foreign currencies over the month with the exception of the Japanese Yen (JPY). The AUD appreciated against the British pound (GBP) by 12.4% in the month of June and 13.6% year to date.

# Property

Australian and global listed property performance rose by 3.5% and 3.0% respectively in June.
